

Illinois Shines PV system Lease Disclosure Form

This form gives consumers who are considering contracting for a solar photovoltaic ("PV") system clear information about the system and their transaction. Execution of this form is required for the system to be eligible for Illinois Shines, a state-administered incentive program.

Illinois Shines (also known as the Adjustable Block Program) provides payments for the sale of Renewable Energy Credits ("RECs") produced by new PV systems. RECs are created when solar panels generate electricity; 1,000 kilowatt-hours of solar production equals one REC. RECs represent the environmental value of solar power. RECs are separate from the electricity and can be bought and sold separately; whoever owns the RECs has the legal right to say they used that solar power. Because the environmental attributes of generation are part of the sale of RECs, customers participating in the sale of RECs relinquish their right to claim they are receiving solar energy.

Through participation in Illinois Shines, for 15 years, all RECs from your system will be sold to Illinois utilities and used to meet a compliance obligation. Payments for these RECs may be used to offset the purchase price or financing cost for your PV system.

There are different ways for customers to contract for a PV system. Customers may (1) buy a system (system purchase), (2) lease a system (lease), or (3) contract to buy electricity generated by a system at an agreed price (power purchase agreement, or "PPA"). Under a system purchase, the customer pays for and owns the system. Under a lease, a customer enters into a service contract to pay scheduled, predetermined payments to a solar leasing company, which owns the system on the customer's property. Under a PPA, a customer agrees to host a system and to buy electricity generated from it at a perkilowatt-hour rate from a company that owns the system. The type of contract will impact the economics of your solar decision.

By participating in Illinois Shines, an installer or other vendor is required to provide you with this disclosure form so that you have accurate information about the PV system, including its size, cost, operations, warranties, and financial benefits. At the point when you decide to enter into a solar contract, you will be asked to sign this form indicating that the information in it has been provided to you. The form will be submitted to the Illinois Shines Program Administrator as part your system's application. The Program Administrator may contact you to verify that you received this form.

The installer or other vendor is also required to provide you with an Informational Brochure about Illinois Shines. Do not sign this disclosure form unless you have received and read that brochure because it provides you with important consumer protection information. The Brochure can be found at http://illinoisabp.com/wp-content/uploads/2018/12/Brochure.pdf

PV System Lease Disclosure Form

You are leasing a PV system. Another party will own the system installed on your property.

The purpose of this form is to provide you with clear and accurate information about terms of your lease, but this form is not a substitute for your contract. <u>Do not rely exclusively on this form for your lease</u>; You should read your contract closely before you sign it.

Because you will not own the PV system, you are not eligible to take the federal income tax credit for PV system owners, but you may receive an indirect benefit in the form of lower lease payments. You may want to consult a tax professional to understand any tax issues related to the system.

At the end of this form, the installer or other vendor will have an opportunity to provide additional details or explanations related to the information contained in the form.

You may rescind your system lease contract and receive a refund of any deposit you paid within three calendar days of signing the contract, by contacting the lessor of the PV system.

Approval from your local municipality will likely be needed for the PV installation.

If you have complaints related to the system or this lease process, first try to resolve the problem with your installer or Approved Vendor. If you can't agree with the company about how to solve the problem, you may contact the Illinois Shines Program Administrator by emailing admin@illinoisshines.com or by calling (877) 783-1820. If you have been subject to fraudulent or deceptive sales practices, the Consumer Protection Division of the Illinois Attorney General's office may be able to help. Customers may contact the Illinois Attorney General's office by calling one of the following hotlines:

Chicago 800-386-5438 TTY: 800-964-3013

Spanish Language: 1-866-310-8398

Springfield 800-243-0618 TTY: 877-844-5461

Carbondale 800-243-0607 TTY: 877-675-9339

selected for the Illinois Shines incentive? □Yes OR □No

• Is PV system installation contingent upon selection for the Illinois Shines incentive?

—Yes

If installation is not contingent, will the pricing terms change if the project is not

*Selection for Illinois Shines is not guaranteed, but if the system is selected, the Approved Vendor, as the counterparty to a REC delivery contract with an Illinois electric utility, will receive payment(s) for your system's RECs. The value of these REC payments may be reflected in your overall system lease payments.

• Other tax incentives or rebates:

Name of Incentive/Rebate	Party Directly Realizing the Benefit of the Incentive

^{*}In many cases, you will not be able to directly take advantage of incentives because the system is owned by a third party. Instead, the lessor or Approved Vendor will realize the incentive benefit. The benefit of these incentives may be passed on to you in the form of reduced costs.

•	The approxima	ite start date	of system installation will be $_$	days from the date your contract is
	signed or	[date].	. 00	

•	The estimated complet	tion date of system	installation will be	$_{}$ days from the date you	ır
	contract is signed or	[date].			

- Does lessor plan to furnish a mechanic's lien waiver to the customer upon final payment? □Yes
 OR □No
 - If so, the approximate date when the installer is expected to furnish a mechanic's lien waiver to the customer will be _____[date].
- YOU \square OR LESSOR \square OR INSTALLER \square are responsible for submitting a system interconnection application to your utility.

*The interconnection rules may vary based on location and utility service territory. Links to interconnection information are provided below for three electric utilities:

- Ameren Illinois: https://www.ameren.com/illinois/electric-choice/distributed-generation
- <u>Commonwealth Edison Company:</u> <u>https://www.comed.com/MyAccount/MyService/Pages/DistributionLess10k.aspx</u>
- <u>MidAmerican Energy Company: https://www.midamericanenergy.com/customer-generation.aspx</u>

If your system is in the service territory of an Illinois municipal electric utility or rural electric cooperative, you should contact them for their interconnection requirements.

System Design Specifications

Size of system in kilowattskW DC andkW AC
*Any system size variations plus or minus more than 5% of the specifications listed above will require
completion and submission of a new disclosure form.
 Estimated gross annual electricity production in kilowatt-hours from your system in the first yearkWh
Estimated annual system production decrease:%
Expected life of the system years
 Expected overall percentage degradation over the life of the system%
System will be ROOF-MOUNTED □ OR GROUND-MOUNTED □
 The manufacturer of the PV panels is If it is not known at this time which manufacturer will provide the PV panels for the system, the panels will be provided by one of the following three manufacturers: 1) 2) 3)
 The make of the inverter is; The model of the inverter is If it is not known at this time what the make and model of the inverter for the PV system is, one of the following three inverter makes and models will be used: 1) Make; Model 2) Make; Model 3) Make; Model

* To participate in Illinois Shines, your system must be connected to the distribution grid. Your electric utility remains responsible for the delivery of electric power to your premises and will continue to respond to any service calls and emergencies. A grid-connected PV system will not function in the case of an electricity outage unless you have an accompanying electricity storage system and the ability to "island" (disconnect from the grid).

Net Metering

*Net metering allows you to receive credit from your energy supplier for electricity generated by your PV system. Your electricity bill will reflect the amount of electricity supplied to you, minus the excess electricity generated by the system and delivered to the grid. To participate in net metering, an application for net metering must be submitted to your electric supplier which is either your local utility or an Alternative Retail Electric Supplier. ¹

System Operations, Maintenance, Warranties, and Guarantees

approved vendor)		
 System repairs (actions required to fix a malfunctioning system) ARE □ OR ARE NOT □ include as part of the system lease. If system repairs are included, foryears by (for example, lessor, installer, or approved vendor) Is the PV system warrantied against issues related to improper installation? ¹ If you are a customer of ComEd, be advised that ComEd has indicated that it believes customers financing a PV system through a PPA arrangement may not be eligible for net metering.

 The lessor WILL OR WILL NOT insure for loss or damage to the system. If the lessor will insure the system for any loss or damage, except under the following circumstances

*You are responsible for any loss or damage to the PV system not covered under the lessor's obligations
above. Consult an insurance professional to understand how to protect against the risk of loss or damage
to the system.
The lessor is providing you with a:
System performance or electricity production guarantee
Other type of system guarantee (please specify)
No system guarantee
*Unauthorized modification of your PV system, including the relocation of it, is prohibited under Illinois
Shines.
Property Transfers
 If you sell your home or business where the PV system is located, you MAY □ OR MAY NOT □ transfer the lease of the PV system to the purchaser(s) of the home or business. If lease transfer is permitted, it will be subject to the following conditions: □ Credit check of the home purchaser(s) □ Minimum FICO score requirement: (dependent upon lessor's credit criteria at the time of system transfer) □ Transfer fee \$
Net Cash Flow Estimate
Estimated total lease savings calculations:
NPV of Lease Over 15 Years: \$
NPV of Electricity Savings Over 15 Years (Low Estimate): \$
NPV of Electricity Savings Over 15 Years (Med Estimate): \$
NPV of Electricity Savings Over 15 Years (High Estimate): \$
* The formula used for determining lease savings computes a net present value of all

^{*} The formula used for determining lease savings computes a net present value of all payments made under the lease and compares that value to a net present value of the electricity your system would produce using a starting price of \$124.80/MWh and an

escalation rate of .5%, 1.7%, and 2.5% based on

U.S. Energy Information Administration average retail price costs for Illinois. A discount rate of 5.5% is used in all cases and the calculation is made over the 15 year term of the Illinois Shines contract. The production figures are based on the first year production with a .5% annual degradation factor. The assumptions used in these calculations are based on past values so there is no guarantee that they will be indicative of future results and they may not match the assumptions you or your solar installer might use. However, the same assumptions are used in every disclosure form for Illinois Shines, allowing you to make an apples to apples comparison of competing offers.

*Nothing listed below shall alter, amend, repeal, or supersede the disclosure requirements contained in this form.

Please Initial	160%
The person or comp	any presenting this Disclosure form also has provided me with a copy, eithe
electronic or printed, of the	llinois Shines Distributed Generation Brochure, and I have had the
opportunity to ask questions	about it.
