Subject: [External] [BULK] Re: REQUEST FOR STAKEHOLDER FEEDBACK: Publishing Community Solar Application Project Information from Projects Selected Through Waitlist Capacity Allocation Process
Date: Monday, March 28, 2022 8:56:58 AM

Hello and good morning,

My name is Armando Gaetaniello and I work at Neighborhood Sun. We are a community solar provider in eight different jurisdictions where a community solar program exists. Our total solar capacity managed and contracted for 2022 is of about 165 mwdc. Currently, we are not serving the Illinois market but we have plans to expand to that jurisdiction within this calendar year.

I am submitting comments as solicited in the email below and the published letter "REQUEST FOR STAKEHOLDER FEEDBACK". We are supportive of the intent of publishing a project queue with the details already proposed in the IPA's letter:

- Approved Vendor name,
- project application number,
- project name,
- project address,
- project size,
- and interconnection queue number (if available).

I would also suggest to add the electric distribution company among those details. Most jurisdictions where community solar programs are established have lists like that readily available. I think they provide transparency to the solar industry as well as legitimacy to any subscriber that benefits from this program.

I appreciate the opportunity to submit comments to you in regarding this matter, and remain available at this email address for any question.

Thank you and power forward,
Armando

Armando Gaetaniello

VP of Business Development
