RE: Amp Energy - Response to TCS Scoring Strawman Proposal Feedback Request  
DATE: September 16, 2022

Dear IPA,

Addendum:

In accordance with our previous comment in which we recommended that (due to changes in the treatment of an existing/valid interconnection agreement in different versions of the 2022 Long-Term Renewable Resources Procurement Plan) Section 4 not apply in the scoring for the November 1, 2022 application window but would begin to apply for the June 1, 2023 application window and all application windows thereafter, we offer the following comment:

The minimum point threshold to receive a spot on the waitlist for the November 1, 2022 should be reduced to reflect the removal of the application of Section 4

We offer the following language:

**Proposed Approach**

***Proposed minimum point threshold for waitlist acceptance:***

***1 points: November 1, 2022***

***5 points: June 1, 2023 and thereafter***

***Projects must receive the minimum score defined above to receive a spot on the waitlist.***

Thank you for your time and attention to our comment.

Chris McDermott  
Senior Director – US Markets and Strategy
