To Whom It May Concern:

The Illinois Power Agency (“IPA”) requested stakeholder feedback on the draft Program Guidebook (“Guidebook”). Clearway Energy Group LLC (“Clearway”) submits the following feedback as it relates to small subscribers.

The Program Guidebook contained a significant change to a “small subscriber” which no longer allows multiple 25 kW allocations across projects. We oppose this change because many small and medium commercial customers and residential customers may no longer utilize community solar to offset their usage if a cap of 25kW is in place. We recommend that the IPA reconsider the change to “small subscriber” so that eligible customers may offset their usage by way of multiple allocations of less than 25kW.

Again, Clearway appreciates the opportunity to provide feedback.

Sincerely,
Clearway Energy Group LLC
