This document provides information on the major steps in the Illinois Shines program for customers interested in installing a solar project on their property. Illinois Shines (also known as the Adjustable Block Program) is administered by the State of Illinois.

1. Review & Sign Disclosure Form and Customer Contract
Your Approved Vendor or its Designee must give you a copy of the Illinois Shines informational brochure and the standard Disclosure Form. Once you have signed the Disclosure Form, you can then sign your Installation Contract. It’s important to carefully review and understand these documents before you sign them.

Your Approved Vendor cannot begin the process of applying for your solar project to be part of the Illinois Shines program until you sign the Disclosure Form.

2. “Part I” Application Submission & Review
The Approved Vendor completes an initial “Part I” application for your solar project to be part of the Illinois Shines program. The Approved Vendor groups your solar project with other projects and submits them as a “batch” to the Program Administrator, who reviews and verifies the applications.

If there are errors in an application, the Approved Vendor has 14 days to correct the errors. Your Approved Vendor may need to contact you to obtain information and correct any errors.

Key Terms:

- **Approved Vendor** — Solar contractor or developer that enrolls your solar project in the Illinois Shines program, and also sells the Renewable Energy Credits (“RECs”) generated from solar projects to the Contracting Utility.
- **Designee** — Works with an Approved Vendor to do marketing, enroll customers, install projects, or other activities.
- **Contracting Utility** — Utility company (Ameren Illinois, ComEd, or MidAmerican) that contracts with your Approved Vendor to buy the RECs from your solar project. May be different that your Service Utility.
- **Service Utility** — Utility company in whose service area your solar project is located. Your Service Utility might be a municipal electric utility or rural electric cooperative. Also, your Service Utility will not always be the same as your Contracting Utility.
3. Commission Review
The Program Administrator sends batches of verified applications to the Illinois Commerce Commission for approval.

- The Commission will review the applications and approve the corresponding Renewable Energy Credit (REC) Contracts between your Approved Vendor and the Contracting Utility. The Commission meets approximately every 2 weeks and the applications must be submitted 8 business days prior to a Commission meeting in order to be considered.

4. REC Contract Execution
Within 1-2 weeks of approval by the Commission, the Contracting Utility signs the contract and sends it to your Approved Vendor, which then signs the contract within 7 business days. Under the REC Contract, your Approved Vendor sells the RECs produced by your solar project to the Contracting Utility.

- The Approved Vendor must also provide collateral to the Contracting Utility for each project. Some Approved Vendors charge a fee to the customer to cover this cost, but many do not.

5. Installation of Your Solar Project
Your Approved Vendor or its Designee installs your solar project! They will also work with your Service Utility to connect your project to the electricity grid and to get it up and running. The timing for your solar project’s installation will depend on the installer’s schedule and the size of your project.

- If you sign up for net-metering with your Service Utility, you should start seeing credits on your bill from the electricity that your solar project generates generally within 1-2 months.

6. “Part II” Application Submission & Review
This includes final details and documentation about your solar project. The Program Administrator may need a few months to review and approve the second application. If there are any problems with the application, the Approved Vendor has 14 days to correct the issue.

- Your Approved Vendor has up to 18 months after approval of the “Part I” application and the REC contract to actually install the project and get it running. Your Approved Vendor cannot submit the final “Part II” application until your solar project is installed and up and running.

7. Contracting Utility Pays Approved Vendor for RECs
The Approved Vendor sends an invoice to the Contracting Utility. For projects 25 kW in size or smaller, the Contracting Utility provides a lump sum payment for the RECs that your project will generate over the next 15 years. Depending on your Installation Contract with your Approved Vendor, a portion of this payment may be passed on to you, or the value of the payment may already be passed through in decreased project costs.

- Approved Vendors send invoices to the Contracting Utilities monthly. The Contracting Utility has 1 month to pay an invoice after receipt. Any pass-through payment to you would be based on the terms of your Installation Contract.
