

Distributed Generation with Illinois Shines

on-site solar serving the energy needs of your home or business

What Is Illinois Shines?

Illinois Shines is a state-administered incentive program to support the development of new solar projects. Through the program, Illinois electric utilities provide payments to Approved Vendors in exchange for 15 or 20 years of Renewable Energy Credits (RECs) generated by new solar projects. Approved Vendors are solar companies that are vetted and approved to participate in Illinois Shines. Approved Vendors may use Designees, who are also registered with the program, to help with sales, marketing, and installation work.

What Is Distributed Generation?

A distributed generation solar project generates electricity that is used on-site. It can be installed on a roof or built on the ground at a home or business.

What Are RECs?

RECs represent the environmental attributes of the electricity generated from solar panels, but not the electricity itself. Whoever owns the RECs has the right to say they used that solar power. By participating in Illinois Shines, the RECs from your solar project will be transferred to an Illinois electric utility. The sale of your RECs will not affect your solar project's production or your ability to use the electricity generated by your solar project. Utilities purchase RECs to meet their obligation to supply a certain amount of power from renewable energy.

For more information on RECs, see a video at vimeo.com/113250210

Will I Be Paid Directly For the RECs My Solar Project Generates?

Your Approved Vendor will receive an incentive payment from the electric utility for the RECs your project will generate over time. Your Approved Vendor may pass along a portion of the incentive payment to you, or they may use the payment to reduce the amount you pay for your solar project (such as a lower purchase price or lower lease rate). **If your Approved Vendor passes along part of the incentive payment to you, this may happen several months after your project is installed.** Illinois Shines is not a rebate program, and the State of Illinois **does not** make direct payments to customers.

You can view an ADA accessible version of this document at www.illinoisshines.com/accessible.

What Are the Ownership and Financing Options When Installing Solar?

The most common options are 1) **PURCHASE**: buy the project outright or finance with a loan 2) **LEASE**: make regular payments to the project owner, or 3) **POWER PURCHASE AGREEMENT (PPA)**: pay the project owner for the electricity generated by the project at an agreed upon per kilowatt-hour rate. If you lease or sign a PPA, you don't own the solar project, but you get to use the electricity generated by the solar project.

When deciding on the best option for you, consider:

- If you're buying the project, how much will it cost? Will you take out a loan to pay for it? How do the loan payments compare to projected reductions in your monthly electric bill?
- If you're leasing the project, how much is your monthly lease payment? How does that compare to projected reductions in your monthly electric bill? Do you have to put money down at the start?
- If you're signing a PPA for the project, how much is the per kilowatt-hour price for the energy produced? How does that compare to your current electricity rate? Do you have to put money down at the start?
- Does your lease or PPA include an escalation clause that increases the amount of payments over time? If so, by how much do payments increase?

Going solar is a significant financial commitment, so exercise the same caution you would when making other major consumer decisions. It is good practice to get quotes from at least three companies and to check references.

You should take the time you need to compare offers and to fully understand the contract before signing.

How Do I Know If I Will Save Money By Going Solar?

You are not guaranteed to save money unless your contract includes an explicit guarantee. The questions below will affect whether you save money. You can answer some questions yourself, while others can be answered by your installer or sales agent.

What per kilowatt-hour rate am I currently paying for electricity?

The higher the electricity rate before you go solar, the more money you can potentially save.

Is my roof good for solar?

The direction your roof faces and how much shade it gets will affect how much electricity a roof-mounted solar project will generate. The roof's condition should also be considered.

How much electricity will the solar project generate?

If your solar project produces more electricity than you use over an annual period, you may not receive value for all the electricity generated.

Will I receive any money for the RECs?

The Approved Vendor will be paid by a utility for your solar project's RECs. The Approved Vendor may pass along a portion of this payment or may use the payment to reduce your cost of going solar.

Can I use the federal Investment Tax Credit?

If you buy your project, you may qualify for a substantial federal income tax credit. Consult your tax adviser.

How long do I expect to stay in my home or business location?

If you lease or sign a PPA, you may be required to buy out the contract if you move. Read your contract closely to understand what happens if you move.

What Is Net Metering and How Do I Enroll?

Net metering measures extra electricity your solar project produces and sends to the electric grid, and credits you for it on your electric bill. To participate in net metering, an application must be submitted to your electric utility.

Make sure you understand if your solar provider will submit a net metering application on your behalf for the solar project. Failure to enroll may significantly decrease the financial value you receive from your solar project.

Consumer Protection

Your solar provider is required to provide you with this informational brochure and a standard Disclosure Form. Review your Disclosure Form carefully and use it to compare offers from other Illinois Shines Approved Vendors. You must receive and sign the Disclosure Form before you sign an installation contract. Other Illinois Shines consumer protections include:

- If you sign a contract for a solar project 25 kW or smaller, you can cancel without penalty within the period allowed by your contract or law, which cannot be less than three calendar days.
- Illinois Shines sets out requirements for what information and terms must be included in your installation contract.
- Only Approved Vendors may submit solar project applications to Illinois Shines; these companies are vetted by the Program Administrator.
- Dedicated Program Administrator staff answer questions and assist in resolving customer complaints.

Complaint Procedures

If you have a problem related to your solar project or the sales process, first try to resolve it with your installer or the Approved Vendor. If you can't agree about how to solve the problem, you may contact the **Illinois Shines Program Administrator** by emailing complaints@illinoisshines.com or by calling 877-783-1820.

If you have been subject to fraudulent or deceptive sales practices, the Illinois Attorney General's Consumer Protection Division may be able to help.

Illinois Solar for All, another incentive program, is available for income-eligible customers and includes savings guarantees. Learn more at www.IllinoisSFA.com.

Illinois Shines Solar Project Purchase Disclosure Form

Solar Project Purchase Disclosure Form - ID# 505483

Illinois Shines is a state solar incentive program. An installer or other vendor is required to provide you with this disclosure form so that you have accurate information about the solar project, including its size, cost, operations, warranties, and financial benefits. More information about Illinois Shines is available at www.IllinoisShines.com and a guide to understanding your disclosure form is available at <https://illinoisshines.com/consumer-protection/disclosure-form-resources>. Another state solar incentive program, Illinois Solar for All, is available for income-eligible customers and includes savings guarantees (visit www.IllinoisSFA.com for more information).

This form is not a substitute for your contract. Carefully read your contract before signing. You may want to compare offers from multiple installers or Approved Vendors. You should take whatever time you need to shop around and to fully understand the contract before signing.

You may rescind your installation contract and receive a refund of any deposit by contacting the project seller within the period allowed by your contract or law, which cannot be less than three calendar days.

If you are unable to resolve a complaint with your installer or Approved Vendor, you may contact the Illinois Shines Program Administrator by emailing complaints@illinoisshines.com or by calling (877) 708-3456. If you have been subject to fraudulent or deceptive sales practices, the Consumer Protection Division of the Illinois Attorney General's office may also be able to help; call (800) 243-0618 or visit <https://illinoisattorneygeneral.gov/File-A-Complaint/>.

Contact Information

Customer Information	
Name	John Doe
Address	123 Illinois St, Chicago, IL 60131
Phone	123-123-1234
Email	jdoe@illinoisabp.com
Service utility	MidAmerican
Customer type	Residential/Small Commercial

Approved Vendor	
Legal Name	IGS Solar LLC
Marketing Name	
Address	6100 Emerald Pkwy, Dublin, OH 43016
Phone	614-659-5675
Email	IGS_ILincentive@igs.com

Project Seller	
Legal Name	Seller
Marketing Name	
Address	123 AV lane, Chicago, Illinois 60131
Phone	123-123-1234
Email	seller@solar.com

Project Installer — Your installer will be one of the following:	
#1	Installer 1
#2	Installer 2
#3	Installer 3

Project Purchase Information and Costs

If your purchase of the solar project will be financed through loans or other means, this may add to the overall costs.

Payment	When Payment is Due	Amount
Deposit or payment at contract signing	At contract signing	\$100.00
Deposit or payment at installation	At start of installation	\$0.00
Amount of final payment due to seller	60 days after installation	\$20,000.00
Amount of any other payments for the project	30 days after installation	\$250.00

Fees that will apply	Amount	When Due	# of Payments	Amount
Maintenance Fee	\$100.00	Annually	20	\$2,000.00
Interconnection Fee	\$100.00	at installation	1	\$100.00

Total amount paid, including purchase price and above fees, for duration of contract

\$22,450.00

Illinois Shines Incentive Payment

You may be eligible for other incentives related to your solar project, including a federal solar tax credit.

Expected value of incentive payment that will be received by the Approved Vendor for the solar project if accepted into Illinois Shines program (acceptance not guaranteed)	\$10,153.00
Amount of the incentive payment that the Approved Vendor will pass on to the customer	\$9,000.00
<i>This payment amount may change if project specifications change</i>	
Is the installation contract contingent upon selection for the Illinois Shines incentive?	Yes
When will Approved Vendor submit an application for the project to Illinois Shines?	Within 30 days of signing

Project Installation

Estimated start date of project installation	30 days from the date the contract is signed
Estimated completion date of project installation	120 days from the date the contract is signed
Estimated date for seller to furnish a mechanic's lien waiver	6 months from installation
Who is responsible for submitting a project interconnection application to your local service utility?	Installer

Project Design Specifications

Project Size (size of project as built may vary by the greater of 1kW or 5%)	6.30 kW AC 6.60 kW DC
Estimated total annual electricity production in first year	9,333.00 kWh
Expected life of the project	25 years
Mounting location	Roof mounted

Project Performance

A solar project's performance can be affected by the type of solar panel used and placement of the panels. For example, solar panels that do not face south, are at too steep or flat of an angle, or are shaded will not produce as much electricity. The capacity factor reflects a project's expected production and can be used to compare design and expected performance between project proposals.

Your project's estimated capacity factor for the first 15 years is: 16.3%

Explanation:

Net Metering

You may be eligible for net metering, which credits your electric bill for excess generation from your solar project. Net metering credits can have a significant impact on the financial benefits of your solar project. **To participate in net metering, an application must be submitted to your electric utility.** For more information on net metering, including credit amounts, how credits roll over, and whether credits expire, please see <https://illinoisshines.com/consumer-protection/disclosure-form-resources>.

Project Operations, Maintenance, Warranties, and Guarantees

Project maintenance (operational upkeep)	Included - provided by Seller for 15 years
Project repairs (fixing malfunctioning project)	Not Included
Warranties related to improper installation	Included - provided by Installer for 10 years
Manufacturer's warranty for solar panels?	Included for 15 years
Manufacturer's warranty for project inverter?	Included for 10 years
Warranty against roof leaks from installation	Included - provided by Installer for 10 years
Is the seller providing a project guarantee?	None
Insurance for loss or damage to the project	Not Included

If You Move

Requirements for including the transfer of your solar project as part of a real estate transaction if you sell your home or business.

Payments on system should be completed, and interconnection will be transferred to new account holder

Value of Electricity and Savings Estimates

Below are low, medium, and high estimates of the dollar value of the electricity your solar project will generate **over 15 years** (how much less you will pay in electric bills), which do not factor in your expenses. Your project may continue to generate electricity, and economic value, beyond 15 years.

These estimates are based on average retail electricity rates in Illinois, and do not reflect the electricity rate or net metering rate variations for your specific utility.

Estimated Range for Value of Electricity Generated by Your Project

Assuming a starting electricity price of 9.41 cents/kWh; electricity price escalation rates of .5%, 1.7%. and 2.5%; production decrease of .5% per year. These estimates use inputs from Illinois Shines to allow for apples-to-apples comparison of Disclosure Forms from different companies. Your project seller may use different assumptions in documents they produce.

To estimate overall savings over the first 15 years (if any), compare the expenses to the estimated benefits

Benefits	
Medium estimate of value of electricity generated over 15 years	\$14,323.46
Value of federal tax credit (if any)	Consult a tax professional

Illinois Shines incentive payment paid to customer (if any)	\$9,000.00
---	------------

Expenses	
Total amount paid by customer (purchase price, fees, etc.)	\$22,450.00
Financing costs (if any)	Consult your financing agreement (if applicable)
