

# Program Violations Report

April 11, 2024

## **July 14, 2023 Update**

The Program Administrator has revised the title, content, and structure of this Report (which was previously titled the “Disciplinary Action Report”). Previously, this Report contained only summaries of investigations that resulted in suspensions of entities participating in Illinois Shines. The Report now includes an additional section (“Warning Letters”) detailing all entities who received Warning Letters from the Program Administrator for confirmed Program violations since June 1, 2023. As required by the Consumer Protection Handbook, Warning Letters will be removed from this Report 12 months following their issue date.

As the Consumer Protection Handbook defines Warning Letters as non-disciplinary, we revised the title of the Report accordingly.

We also added a Table of Contents with links to each entry in the Report.

Finally, please note that not all violations of Program requirements are reflected in this Report. Only those that rise to the level of Warning Letters or Suspensions. Please see the Consumer Protection Handbook for further explanation of the processes followed by the Program Administrator for consumer protection violations and potential violations.

### **Common Energy, LLC (“Common Energy”)**

**Entity Type:** Approved Vendor, Designee

**Reason for Suspension:** Common Energy was suspended for editing the standard text of the Disclosure Form and presenting the modified Disclosure Form to customers. In addition to editing the Disclosure Form, Common Energy did not generate the Disclosure Forms properly.

**Suspension Start Date:** February 11, 2022

**Appeal:** Submitted February 25, 2022. Granted on September 19, 2022, on condition of Alternative Disciplinary Plan compliance. The Illinois Power Agency (“IPA”) granted the appeal because Common Energy had stopped its use of the noncompliant, modified Disclosure Form, and because the violative conduct may not have been as egregious as some of the conduct for which entities are typically suspended. For example, Common Energy’s use of the modified Disclosure Form did not appear to be intended to mislead customers. Further, additional recent Program violations supported the conclusion that Common Energy did not have appropriate staff and internal protocols to ensure compliance with Program requirements. In place of a suspension, the IPA worked with Common Energy to develop an Alternative Disciplinary Plan to ensure future compliance. The Alternative Disciplinary Plan includes the development of a stronger training program for its agents, the integration of a Chief Compliance Officer, and the hiring of a third-party consultant to perform compliance audits.

**Suspension End Date:** May 11, 2022; Appeal granted, and previously stayed suspension waived in favor of Alternative Disciplinary Plan; Approved Vendor and Designee status maintained.
