Ongoing Operations Updates

- **May REC Invoicing Opened May 1, 2024** - REC invoices and Quarterly Netting Statements were made available for download from AV SharePoint folders on **May 1, 2024**. Invoices must be submitted to the utility by May 10, 2024 to receive payment for the May invoice period. Any invoice amounts not submitted to the utility by May 10, 2024 will be carried forward and included in the next invoice period (August 2024).
- **Part II Verification Cut Off for May** - To allow time for invoice calculation and generation, the last valid Part II Verification date for May will be **May 24, 2024**. Applications that are Part II verified on or before May 24, 2024 will be included in the June invoicing period. Application processing will continue throughout the last week of the month and any applications that are reviewed between May 25, 2024 and May 31, 2024 will be invoiced in July 2024.
- **Re-Batching for ICC Meetings** - In advance of each submission of batches to the ICC for approval, AVs are provided the opportunity to withhold or re-batch projects. In the absence of any action by an AV, the Program Administrator will re-batch the projects at their discretion and submit eligible projects to the ICC.
 - **It is extremely important that AVs review their re-batching files on SharePoint to indicate any re-batching preferences, but especially requests to withhold projects from submission.** The Program Administrator alerts AVs by email when they have projects that are eligible for re-batching and planned to be submitted to the ICC in the next memo. Unfortunately, sometimes these communications are missed, and projects are submitted to the ICC despite an AVs intent to hold a project back.
 - The Program Administrator requests that AVs who believe they may want to withhold or re-batch projects mark their calendars and review SharePoint folders for re-batching templates. This way, if any email alerts are missed, AVs are still aware of the dates that re-batching opens and can check if any projects are in the upcoming ICC submission. Below are the next re-batching windows:

Re-Batching Opens for AVs	Election Deadline – 12:00 p.m. CPT (Re-batching closes for AVs)	Trade Date (ICC Meeting Date)

7/8/2024	7/10/2024	7/24/2024

Application Processing Updates

- **Application Processing Tables** - Application processing tables are maintained at IllinoisShines.com/project-application-reports/. These tables are typically updated daily, but in some cases may experience slight delays. The Program Administrator is currently experiencing technical issues and data on the [Project Application Reports](#) page and it may not be updated daily. Thank you for your patience as the Program Administrator works on a solution. For questions about specific project applications, please contact the Program Administrator at admin@IllinoisShines.com.

Ongoing Program Portal Updates

- The latest portal updates and enhancements, a Portal Development Roadmap, and portal help guides can be found at <https://illinoisshines.com/portal-updates/>.
- **Portal Maintenance and Releases** – Scheduled system maintenance windows continue on **Tuesday and Thursday evenings (from 8:00 p.m. to 11:00 p.m. CPT)**, during which times the Portal is typically unavailable to users; the Program hopes these windows are minimally disruptive to Program participants. **Users working in the Portal should save their work prior to the 8:00 p.m. CPT start of system maintenance window, as any unsaved information will be lost when the system is moved into maintenance mode.** In some cases, Portal availability may resume earlier than 11:00 p.m. CPT, though **AVs and Designees should plan on the full three hours.**

Draft 2024 REC Delivery Contracts	March 22, 2024	April 5, 2024	Comments received are published here . Final 2024 REC Delivery Contracts were published on April 22, 2024 and can be found here .

On April 18, 2024, the IPA released a final version of the updated Program Guidebook, 45 days in advance of the start of the 2024-25 Program Year, for AVs and Designees to become fully compliant with new requirements by June 3, 2024.

- **REC Transfers** – As a reminder, June 1, 2023 - May 31, 2024 constitutes the “2024 delivery year.” RECs successfully transferred during the delivery year are used to calculate any necessary collateral adjustments or contract default. **This means generation data must be uploaded into GATS or M-RETS and transferred to the Buyer by May 31, 2024.**
 - *Please note: Once generation data is uploaded to GATS, it may take up to seven days for the data to process and for a REC certificate to be created. Once created, the certificate needs to be transferred successfully. Keeping this in mind, please endeavor to have all available energy generation data uploaded to GATs at least seven days before May 31, 2024 to allow time for REC certificate creation and transfer.*
 - *Generation data uploaded to M-RETS is processed instantly, creating, and transferring RECs per a standing order within moments. Nonetheless, AVs may want to act early out of an abundance of caution. Any RECs generated or transferred after the May 31, 2024 deadline will be counted towards the **2025** delivery year’s Annual Report.*
- **IPA Request for AVs and Installer Designees Interested To Serve Stranded Illinois Shines DG Customers** - As previously [announced](#), the Program seeks entities interested in serving stranded customers, and [updates the lists](#) of participating vendors on a rolling basis.
