Subject: [External] Harvest Solar, LLC - Feedback on REC Price Cost Collection
Date: Friday, November 22, 2024 12:37:03 PM

The Crest Model will be very time-consuming and accounting cost to provide this information would also be time-consuming & costly. The details would require not only time and cost but would delay the submission of the part 2's for each project. Confidential information the plan is purposing is a concern as well. It would seem the outcome of your main goal could be achieved in a simplified manner.
