Hello,

On behalf of PureSky Community Solar, we respectfully submit the following feedback regarding the proposed edits to the Illinois Shines Community Solar Contract Requirements.

We question the necessity of the proposed revision requiring contracts to disclose the size of a customer's community solar subscription or share of the project. Because the Disclosure Form is already a required document, and already includes the customer's subscription size and share, this information is being clearly communicated through existing program requirements.

Given that, we would appreciate clarification on the rationale for requiring this same information to be included in the contract as well, as it appears duplicative of the Disclosure Form.

Thank you for your consideration of this comment.

Kind regards,

Molly McCready
