

Program Violations Report

May 14, 2026

July 14, 2023 Update

The Program Administrator has revised the title, content, and structure of this Report (which was previously titled the “Disciplinary Action Report”). Previously, this Report contained only summaries of investigations that resulted in suspensions of entities participating in Illinois Shines. The Report now includes an additional section (“Warning Letters”) detailing all entities who received Warning Letters from the Program Administrator for confirmed Program violations since June 1, 2023. As required by the Consumer Protection Handbook, Warning Letters will be removed from this Report 12 months following their issue date.

As the Consumer Protection Handbook defines Warning Letters as non-disciplinary, we revised the title of the Report accordingly.

We also added a Table of Contents with links to each entry in the Report.

Finally, please note that not all violations of Program requirements are reflected in this Report. Only those that rise to the level of Warning Letters or Suspensions. Please see the Consumer Protection Handbook for further explanation of the processes followed by the Program Administrator for consumer protection violations and potential violations.

Successfully Appealed Suspensions

Common Energy, LLC (“Common Energy”)

Entity Type: Approved Vendor, Designee

Reason for Suspension: Common Energy was suspended for editing the standard text of the Disclosure Form and presenting the modified Disclosure Form to customers. In addition to editing the Disclosure Form, Common Energy did not generate the Disclosure Forms properly.

Suspension Start Date: February 11, 2022

Appeal: Submitted February 25, 2022. Granted on September 19, 2022, on condition of Alternative Disciplinary Plan compliance. The Illinois Power Agency (“IPA”) granted the appeal because Common Energy had stopped its use of the noncompliant, modified Disclosure Form, and because the violative conduct may not have been as egregious as some of the conduct for which entities are typically suspended. For example, Common Energy’s use of the modified Disclosure Form did not appear to be intended to mislead customers. Further, additional recent Program violations supported the conclusion that Common Energy did not have appropriate staff and internal protocols to ensure compliance with Program requirements. In place of a suspension, the IPA worked with Common Energy to develop an Alternative Disciplinary Plan to ensure future compliance. The Alternative Disciplinary Plan includes the development of a stronger training program for its agents, the integration of a Chief Compliance Officer, and the hiring of a third-party consultant to perform compliance audits.

Suspension End Date: May 11, 2022; Appeal granted, and previously stayed suspension waived in favor of Alternative Disciplinary Plan; Approved Vendor and Designee status maintained.

National Solar Energy

Entity Type: Approved Vendor

Reason for Suspension: National Solar Energy failed to submit its Minimum Equity Standard (“MES”) Compliance Plan to the Program by the June 1, 2023, deadline. National Solar Energy also failed to respond to the Program Administrator’s Notice of Potential Violation and Warning Letter related to its failure to submit its MES Compliance Plan. Entity originally suspended for 3 months.

Suspension Start Date: August 29, 2023

Appeal: On September 29, 2023, the IPA rescinded this Suspension on appeal by National Solar. The IPA reasoned that the Program Administrator had sent the underlying Warning Letter and Notice of Potential Violation to an old/unused email address for National Solar. The IPA reminded National Solar of its responsibility to abide by all Program requirements independent of receiving email reminders from the Program Administrator.

Suspension Status: Appeal granted. Approved Vendor status maintained.

SOLAR STAR HD ILLINOIS, LLC (“SOLAR STAR HD ILLINOIS”)

Entity Type: Approved Vendor
